Stretch of Valley Boulevard to be rebuilt

SAN BERNARDINO - A contractor will rebuild a badly deteriorated stretch of Valley Boulevard in unincorporated Fontana starting in January, according to a \$540,800 contract approved by the Board of Supervisors on Tuesday.

Workers will remove the surface of Valley Boulevard between Mulberry and Banana avenues through a process called "cold planning" and will then resurface the road with asphalt concrete.

"Anyone who drives this cracked and potholed stretch of Valley Boulevard regularly knows how necessary this project is," Second District Supervisor Paul Biane said. "Motorists can expect some minor traffic inconveniences along the way, but they will be rewarded with a smooth driving surface once the work is completed."

The project, which is expected to wrap up in March, will require crews to reduce traffic on the stretch of Valley Boulevard to one lane in each direction. The contractor is required to notify local businesses and residents of impending

construction delays. Drivers are urged to slow down and use caution when passing through the construction zone.
